Null Value replacement

--We can replace NUll values from column by using three factions

--1.ISNULL()

--2.Coalesce()

--3.Case()

```
create table NULL_TEST(NID int, EMP_NAME varchar(20),Manager
varchar(20))

insert into NULL_TEST values (1,'Piya','Sohan')

insert into NULL_TEST values (2,'kate',NULL)

insert into NULL_TEST values (3,'meera','aman')

insert into NULL_TEST values (4,'amit',NULL)

insert into NULL_TEST values (5,'sumit','Kiran')

select * from NULL_TEST
```

--1.ISNULL()

--This function will help us to replace NULL value with any other user
defined value.

  --synatx: ISNULL(Colname,'String')

  --It will accept Two arguments

```
select NID,EMP_NAME, ISNULL(Manager,'No Manager') AS MangerDetails
from NULL_TEST
```
